

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

January 29, 2004 LB 172

I had a friend who found out that she was pregnant. And she was...she was afraid to tell her parents because the young man was somebody...

SENATOR CUDABACK: One minute.

SENATOR SCHIMEK: ...of whom her parents did not approve. But she did because she really didn't have anywhere else to turn and that was probably the right thing to do. Well, the parents immediately, immediately insisted that this young woman have an abortion. This was when abortions were illegal, and so her parents, who were wealthy, had to go and find a way to do this illegally. I am sure to this day that that young woman did not want an abortion. I think she cared very deeply about the young man, and she was being separated from him by her parents. And they eventually were successful. She never married the young man. But I think sometimes we need to be careful what we wish for.

SENATOR CUDABACK: Time.

SENATOR SCHIMEK: Again, ending a sentence in a preposition, Senator Chambers.

SENATOR CUDABACK: Thank you, Senator Schimek. Senator Landis, on the Chambers amendment, FA1437.

SENATOR LANDIS: I'm going to give a second and a last speech in this area. I'm not attempting to draw out the vote, which I think is inevitable here. I think I made a legitimate point last time, with information that's not been on the record before, and that was the number of cases of abuse and the number of cases of children outside the home. We've not had that information. Senator Foley hasn't brought it, Senator Chambers, Senator Schimek. I think it was a legitimate piece to make. Secondly, I want to talk about a value choice, which I want to identify again. The value choice here is a value choice that says, it's more important to stop schools from informing young girls of their constitutional statutory rights than it is to see to it that girls in abusive or violent circumstances get information from a legitimate source other than their parents.
